

Updates Submission (Engineers)

Also known as Weekly Updates, Highlights, 3Ps, and other names it's been called in the past six months.

This requires [Golden Standards](#) to be set up in your project and enable the [Jira Sync](#) to be enabled. If either step is missing, please work with your Project Manager to add it to the project.

This process relies on the [TEA Central Integration](#) to send updates from Jira into TEA Central. If you're unable to submit updates through Jira, please use the [Weekly Updates Form](#) instead.

- [How Often to Submit Updates](#)
- [How to Submit Your Update](#)
 - [Option 1: From Jira Sheets](#)
 - [Option 2: From the Epic](#)

How Often to Submit Updates

Each Tuesday, submit one update for each deliverable or epic. The update should cover what happened from the previous Wednesday through the current Tuesday, along with plans for the near future.

- Always include the Tuesday date for the week.
- Each submission can include multiple bullet points with details.
 - If there are additional updates later in the same week, by you or someone else, append them to that week's entry instead of replacing it.
- When a new week starts, update the PPP fields as usual by replacing the values.

Examples

Jira Epic	Assignee	Progress	Plans	Problems
KW-001	Engineer L-kun	10 Feb 2026 - Migrated EKS Cluster to Mariner - Deployed new microservices	10 Feb 2026 - Work on decommissioning the pipelines.	
KW-002	Engineer C-kun	10 Feb 2026 - Completed preparations for the cluster on East-1	10 Feb 2026 - Continue conversations with Data team. - Update pipelines to include new region.	10 Feb 2026 - We may not be able to complete the DR on time because of dependencies outside of our control. - We require some assistance with the solutions for certain Service Catalog items that are outdated.

Additional Entries

New updates reset items already submitted by your manager. If you need to add something after Tuesday, append it to the current week's update with the correct Tuesday date and let your manager know so they can review it again in PPP Promoter.

How to Submit Your Update

Depending on your role, one approach may work better than the other:

- **Multiple Epics?** Use Jira Sheets to see all your items in a single view.
- **Single Epic?** Go directly to the ticket.

Option 1: From Jira Sheets

Option 2: From the Epic

1. Go to the Jira Sheets for your project.
2. Find the **OKR View** (or any view that displays the **Core Fields: Progress, Plans, and Problems**)

...	PROSERV-3055	...	Unassigned	...	Unassigned	Eng...	...	...	...
...	PROSERV-3082	...	Unassigned	...	Unassigned	Eng...	...	...	...
...	PROSERV-3088	...	Unassigned	...	Unassigned	Eng...	...	...	...
...	PROSERV-3089	...	Unassigned	...	Unassigned	Eng...	...	...	...
...	PROSERV-3070	...	Unassigned	...	Unassigned	Eng...	...	...	...
...	PROSERV-3071	...	Unassigned	...	Unassigned	Eng...	...	...	...

The first time you update any of the 3 PPP fields, you'll need to add them through the edit menu:

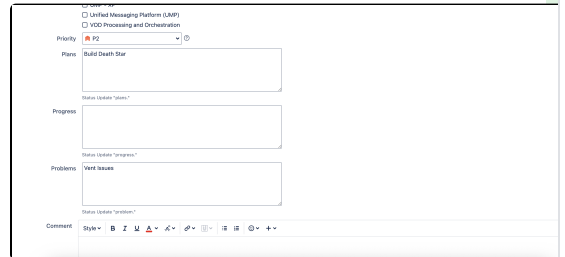

1. Open your Epic and click **Edit**.

2. Select **Core Fields**.

3. Scroll down to find Progress, Plans, and Problems

4. Fill in your updates.

Once the fields are visible on the ticket, you should be able to edit them directly without going through the edit menu.
