

Assessment and Publishing (Leadership)

Thursday is dedicated to presenting selected weekly reports to leadership and deciding which updates will be published to Jay Donnell's Airtable Base.

The goal is to provide a clear, concise, and reliable view of progress across ProServ, surfacing impactful wins, risks, and meaningful updates, while enabling informed executive decisions without requiring deep dives into raw data.

Publishing ensures that:

- Leadership effort is translated into an executive-ready summary
- Key progress, blockers, and patterns are visible at a glance
- Escalations reach the right level quickly
- Reporting remains consistent week over week

Report Sources

Available items on Thursday can come from two sources:

- [PPP Promoter](#): Items promoted during Wednesday's [Updates Review \(Managers\)](#).
- [Weekly Updates Form](#): An alternative submission path for teams that do not provide updates directly through Jira.

Quick Access

- [ProServ Site](#)

 - [Intake](#)

Phases & Statuses

Thursday is divided into three phases. From the [Weekly Reports Review](#) perspective, this process is represented across four tabs, each with its own set of statuses (see image below).

Initiative / Topic	Details / Summary	Status	POLISHED DETAILS / SUMMARY (wordsmithed)	Monthly Saving Costs	Category	Stage	Due Date	Reviewer
Tagging - Descriptive Metadata ...		NEW	-	-	-	Development	-	-
12/09/2025 - Add Periscope Inge...	Key Achievements:	NEW	-	-	-	-	-	-
12/11/2025 - Enable natural langu...	Key Achievements:	NEW	-	-	Progress Update	Development	-	-
Tagging - Descriptive Metadata ...	Monitoring implementations are ready:	NEW	-	-	-	Development	-	-
Recorded Music: Secure Databas...	Implemented Group Managed Service Accounts (gMSA) for SQL authentication to eliminate...	NEW	-	-	-	Launched	-	-

These statuses reflect the decisions made throughout the day and determine how each report progresses through (or exits) the current publishing cycle.

The table below outlines this mapping.

Phase	Airtable Tab	Purpose	Associated Statuses	Details
Review	1. REVIEW	Initial leadership review of new items and updates with open questions	NEW	Submitted via the Weekly Updates Form .
			MANAGER CHECKED	Submitted via the PPP Promoter .
Refine ment	2a. REFINE	Improve clarity, completeness, and phrasing before publication	FURTHER REVIEW	Requires additional context, data, or clarification before approval
	2b. Ready to PUBLISH	Final, approved content ready for submission	READY TO PUBLISH	Approved content ready to be submitted to the publication cycle
Public ation	3. Closed	Historical record of completed decisions	PUBLISHED	Successfully submitted to Jay Donnell's reporting base
			NOT PUBLISHED	Reviewed but excluded from publication
	QX Highlights	Published reports within the defined quarter	READY TO PUBLISH	Along with the timeframe.
			PUBLISHED	
	- All -	Complete visibility across the reporting lifecycle	*	Aggregated view of all items, reverse-sorted by creation date

Workflow

Phase 1: Review

Managers present their key highlights.

- Items are reviewed live during the meeting
- Leadership may ask clarifying questions
- Missing context triggers follow-up actions and required adjustments

Based on group consensus, each item is assigned one of the following statuses:

- **Ready to Publish:** Moves to the **Publication Phase**
- **Further Review:** Moves to the **Refinement Phase**
- **Not Published:** Closed

Phase 2: Refinement

Managers gather and add any missing information on updates in **Further Review** status, identified during the Review phase.

- This typically involves reaching out to the engineers who submitted the update
- Additional context may include:
 - Cost savings
 - Impact or outcomes
 - Risks or blockers
 - Clarification of scope or ownership

The deadline and owner for refinements completion will be decided during the review meeting and captured in the **Due Date** and **Reviewer** fields. Completing them the same day would allow the item to remain in the current week publication cycle, while later updates would push the item to the following week report. Once the updates are completed the update can be moved into **Ready To Publish** status.

Phase 3: Publication

This phase finalizes the weekly updates with all promoted item in status **Ready to Publish**. Our Fleet leader will select items from the list of Ready to Publish updates and manually publish them into Jay Donnell's Airtable.
