

Golden Standards Onboarding

Your Jira project should already be onboarded on the **Golden Standards (GS)**.

If You Don't Have GS

In the case that you aren't onboarded yet, then you will need to do the following:

- The TPM should request support with onboarding of the Golden Standards.
- You can engage with them through the [Golden Standards channel \(DEEP&T Atlassian Cloud Standards\)](#), or better submit a ticket through the [Atlassian Standards Requests and Feedback](#).
 - Use the **Project Conversion Request** option.
 - Request that your project needs to be migrated to Squad 1 template in order to have the 3Ps fields, like [PROSERV](#).

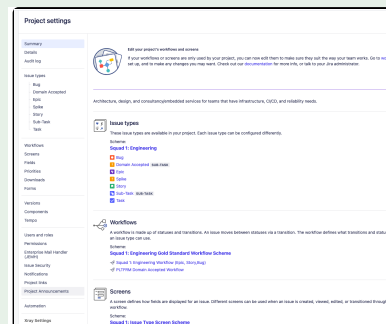

Once done, you can do the [TEA Central Jira Sync Onboarding](#).

How to Know If You Have GS (As an Engineer)

How to Know If You Have GS (As an Admin)

How to Know (Easy Way)

Admins of the project can navigate to the summary page in the project settings and any schemes using Squad 1, 2, or 3 would be a standardized project.

Create a new issue, open **Configure Fields**.

Select **All Fields**.

Now, **Core Fields** should be visible.

And with that, you should be able to see on Epics the fields: Key Achievements, Plans, and Problems.

There is a quick way to check if you have it, go to this [Airtable Page](#) which contains all Jira Projects and their details.

The expected **Screen Scheme** field should have something along the lines of "Squad 1: Issue Type Screen Scheme" rather than something like "Talent Issue Type Screen Scheme"

- **Not standardized:**

- **Standardized:**
