

Jira Integrations Migration

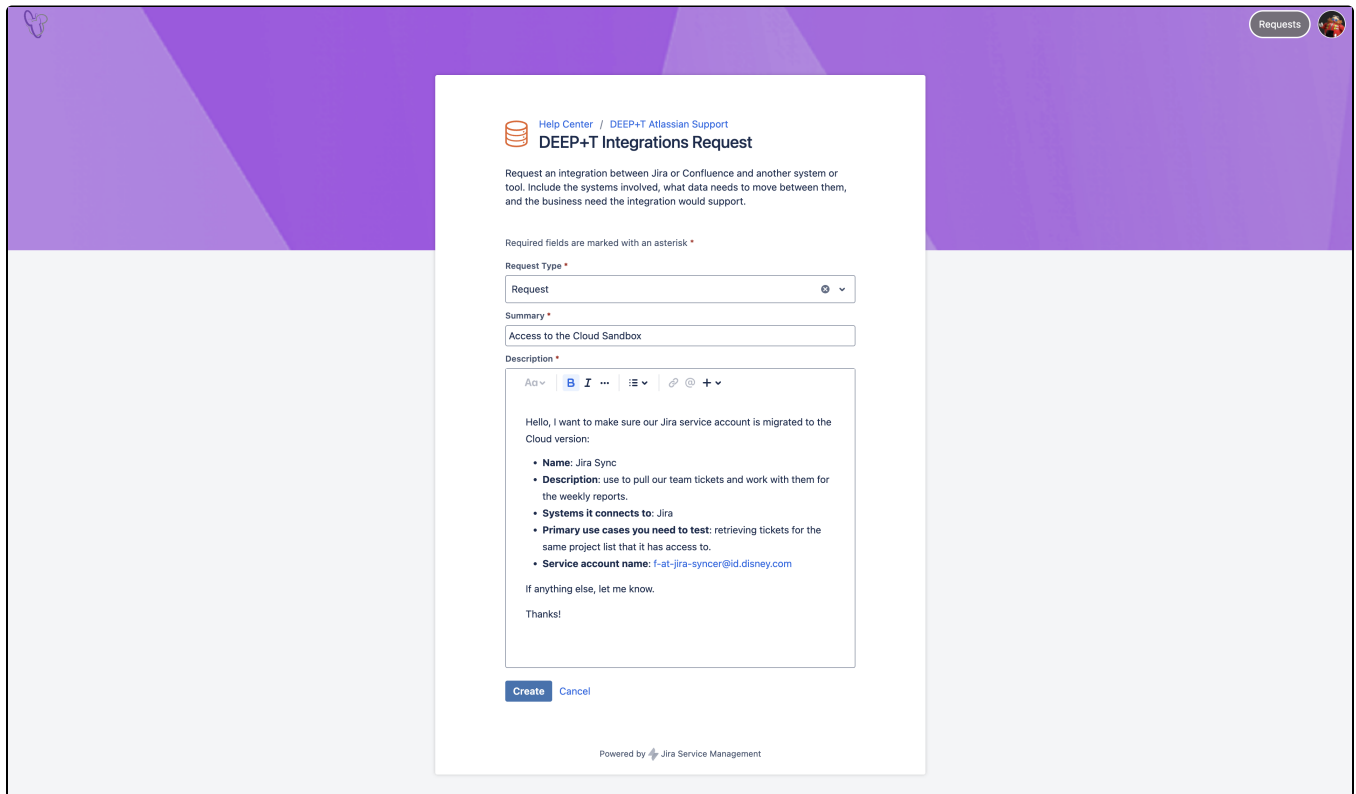

We are less than a month away from getting Jira migrated to the Cloud version, and with that, we need to make sure we move our integrations over to it. There's an official document [here](#), but since I get paid per page, I'll add some extra stuff and call it a day.

Known/Used Integrations

- [Gitlab Repository](#): smart commits.
- [Teams Integration](#): update notifications based on your defined rules.
- [Service Account](#): if you're that well connected.
 - Relevant Documentation: [configurations](#) and [official docs](#).

Service Account Migration

Assuming that you already have an account, create [here](#) a request for the Atlassian Support Team. See below the format.

The screenshot shows a web form titled "DEEP+T Integrations Request" within the Atlassian Help Center. The form is set against a purple header and a light grey background. It includes a breadcrumb trail "Help Center / DEEP+T Atlassian Support". The form fields are: "Request Type" (a dropdown menu with "Request" selected), "Summary" (a text box containing "Access to the Cloud Sandbox"), and "Description" (a rich text editor). The description contains a message about migrating a Jira service account to the Cloud version, listing details like "Name: Jira Sync", "Description: use to pull our team tickets...", "Systems it connects to: Jira", "Primary use cases you need to test: retrieving tickets...", and "Service account name: f-at-jira-syncer@id.disney.com". At the bottom of the form are "Create" and "Cancel" buttons, and a footer note "Powered by Jira Service Management".

DEEP+T Integrations Request

Request an integration between Jira or Confluence and another system or tool. Include the systems involved, what data needs to move between them, and the business need the integration would support.

Required fields are marked with an asterisk *

Request Type *

Request

Summary *

Access to the Cloud Sandbox

Description *

Aa | B | I | ... | | | | | | | | | |

Hello, I want to make sure our Jira service account is migrated to the Cloud version:

- **Name:** Jira Sync
- **Description:** use to pull our team tickets and work with them for the weekly reports.
- **Systems it connects to:** Jira
- **Primary use cases you need to test:** retrieving tickets for the same project list that it has access to.
- **Service account name:** f-at-jira-syncer@id.disney.com

If anything else, let me know.

Thanks!

Summary: Access to the Cloud Sandbox
Description:

Hello,

I want to make sure our Jira service account is migrated to the Cloud version. Details below:

- Name: Jira Sync
- Description: Used to pull our team's tickets and work with them for the weekly reports.
- Systems it connects to: Jira
- Primary use cases to test: Retrieving tickets for the same project list it currently has access to.
- Service account name: f-at-jira-syncer@id.disney.com

If you need anything else, let me know.

Thanks!

Once created and approved, you can continue to the next step.

From the [AD Group Management Portal](#):

- **Link the AD Group:** APP-GS-AES-CLD-INTEGRATION
- **Link the Members:** your service account name, for this example **f-at-jira-syncer**.
